Dear Parents

The year one and two students will be attending an in-cursion run by Reverse Garbage here at school in the multi-purpose building on Wednesday 11 March. The purpose of this in-cursion is to fuse art and environmental education. The presenters will teach which natural resources that used materials come from and participants develop an appreciation of how consumption and waste impacts on our environment. The creative application of salvaged materials also encourages thinking outside the square and about ways that ordinary objects that are often deemed as rubbish can be reused.

Year One – 9.30 to 10.30 – topic Wind Chimes
Year Two – 11.30 to 12.30 – topic Explorer Kit

As this is a very hands on experience we ask for a couple of parent volunteers to assist teachers on the day in both sessions. If you are able to help please let Irene Elder know as soon as possible.

Please fill in the medical form and return to school as well.

Thanking you
The Year One and Two teachers
